

# Latens

## Senior Software Engineer (SSE-10)

**Closing Date: Monday 25th January 2010**

The role requires extensive programming experience in a variety of areas in a Linux/Unix environment. The candidate must be able to demonstrate experience in the following areas:

- UI Development using standard web technologies (HTML / DHTML / CSS)
- Javascript
- Java

Experience in the following areas is desired (but not essential):

- Web 2.0 technologies (e.g. AJAX)
- JSP / Tomcat / Struts
- C / C++

The successful candidate will also be expected to mentor junior engineers in software development best practices.

Candidates should have an Honours Degree (or MEng) in Software Engineering, Electrical/Electronic Engineering or Computer Science, or equivalent experience and skills.

Training will be provided in all aspects of the role and associated technologies. Latens offers a remuneration package which includes a competitive salary and additional flexible benefits.

As we operate in a Global Environment, the role may provide opportunities for travel.
